

OddFellows Board of Directors
Responsibilities of ROADS Director

- 1) Develop annual prioritized list of roads requiring maintenance and/or asphalt paving. Determination to be based on:
 - A) Frequency of travel trips on the road as a Park thoroughfare.
 - B) Structural condition of the road.
 - C) Structural 'R'-value of the existing road construction.
 - D) Cost estimates for structural design of new work (asphalt thickness, petromat fabric to separate cracking asphalt from new asphalt overlay, drainage problems which create unstable road structural section.
 - E) Life expectancy of new road construction versus cost magnitude for proposed work..

- 2) Provide contract specifics to potential roadwork contractors for cost proposal submittal. Evaluate bids. Schedule work.

- 3) Evaluate existing and new paved roads for continued durability maintenance.
 - A) Crack sealing
 - B) Slurry Seal application
 - C) Drainage pipe/swale construction to alleviate saturated subgrade degradation and asphalt cracking.

- 4) Provide bids for road related work (i.e. concrete garbage dumpster pad, speed bumps, gate/entrance magnetic loop detectors for automatic gate opener).

- 5) Research new products and construction methods to provide better road durability at competitive price.
