SIERRA PARK NEWS FOR NOVEMBER 1988

SIERRA PARK LODGE #876 Odd Fellows meetings are held the 2nd & 4th Sat. of each month at 7 PM in the Rec. Hall. Next meeting will be November 26. The installation of new officers will be held at Sonora Odd Fellows Hall on Jan. 14, 1989 at 8 PM. Put this date on our calendar and members and friends are invited to attend.

WEATHER It is time to winterize your cabins as the temperature has been down to freezing and we have had some snow. Broken pipes in your cabin will result if not drained. Also bring chains for your car as the caretaker does not do any towing. Call C.H.P. or someone in the park if you want to know weather conditions.

ANNUAL THANKSGIVING AND CHRISTMAS DINNERS - Our Thanksgiving dinner was well attended and enjoyed by all. A big thanks goes to Barbara Armstrong and her committee and all those that brought food. Mark December 10, 1988 down on our calendar for our Christmas Dinner. It will be in the Rec. Hall at 6 PM. Menu is Ham so bring potatoes, vegetables, salad or dessert to go with it. Call Barbara Armstrong at 586-5670 so everyone won't bring the same food. (See minutes for further information.)

NEIGHBORHOOD WATCH - Keep watch on your neighbors cabins as we have had some break-ins. Report anything unusual to the sheriff or caretaker.

Have a Happy Thanksgiving - See you next month.....Sierra Sue

BACTERIOLOGICAL QUALITY STANDARD FAILURE

Dear Customer:

The bacteriological quality of water served by the Odd Fellow Sierra Recreation Association Water System during the month of September 1988 did not meet the drinking water standards specified in the California Domestic Water Quality and Monitoring regulations. The bacteriological quality of domestic water is routinely determined by testing for coliform bacteria. Coliform organisms are indicators of potential contamination and may originate from human, animal, or soil sources. If the coliform standards are met, the water served can be considered as being bacteriologically safe. If they are not met, drinking the water may not necessarily result in illness, but that possibility exists. At times, a positive coliform bacteria test may result from situations which are not a hazard to health. However, the finding of coliform bacteria cannot be ignored and each water utility must take appropriate follow-up action.

Upon determination that the coliform standards were not being met, the following action was taken by the Water Company:

The system was chlorinated and flushed. Subsequent bacteriological sampling results were in compliance with water quality standards.

The findings to date indicate that no special precautions or actions are necessary on your part.

This notification to the public is being done in compliance with the California Domestic Water Quality and Monitoring Regulations as a means of keeping the public informed.

Consumers wishing more information should contact the Odd Fellows Sierra Recreation Association Water Company in Long Barn at (209) 596-7586.
