**Subject:** Notice of Water System Flushing  
**Date:** Friday, February 2, 2018 11:11:15 AM

---

Dear Valued Customers –

We have been given the go-ahead from the Water Resource Board to flush our water system. We will resume doing this in the spring and fall of each year going forward. For the last 2 years we have been instructed not to flush due to the drought. Although we are not seeing another year of record breaking rainfall, there is noticeable sediment built-up in our water system. The system will be flushed starting Thursday 2/8/2018. The flushing will not guarantee crystal clear water, it will though reduce significantly the amount of sediment in the pipes. All customers should be aware that there will be a chance that they will notice cloudy water for a few days after the flushing. Please be sure to flush your lines after the project has been completed or the next time that you are up at your residence.

Please pass this news around to your neighbors and friends as we do not have everyone's email address at this time. We will put a notice up at the front entrance and also at the lodge.

We regret any inconvenience that this might cause you. Clean water is the best water.

Thanks,  
Kirk Knudsen  
President  
Sierra Park Water Company
